

CLICK RAIL PRO

The Click Rail Pro is the perfect hanging system for the professional user, who demands the look and qualities of the Click Rail. The Click Rail Pro provides a heavier finish, which is even faster to mount and offers the choice between two different hanging options, each with their own unique qualities. With the first hanging option, you choose an installation where the rail connects perfectly to the ceiling. Hanging option 2 provides a subtle, "invisible hanging" through hidden sliders. The Click Rail Pro is available in a Primer finish, enabling you to paint it over in the same colour as your walls. Your hanging system will beautifully fade over into your wall and provide an overall subtle, perfectly finished look.
